Please read all of the instructions carefully and retain for future reference.

**Safety Instructions**

When using electrical products, basic safety precautions should always be followed. This product is not intended for use by persons, including children with reduced physical, sensory or mental capabilities, lack of experience or knowledge. A person responsible for their safety should give them supervision and instruction in the use of the product. Children should be supervised at all times to ensure that they do not play with the product. This product is not a toy.

This product contains no user serviceable parts. Only a qualified electrician should attempt repairs. Improper repairs may place the user at risk of harm.

Avoid liquid spills on the product.
Do not immerse the product in water or any other liquid.
Do not use the product outdoors or on wet surfaces.
Do not store the product in direct sunlight or in high humidity conditions.
Do not operate the product after a malfunction or if it has been dropped or damaged in any way.
Do not use the product for anything other than its intended use.
This product is intended for domestic use only. It should not be used for commercial purposes.

**Battery Safety**

Ensure that the battery compartment is secure.
Only batteries of the same or equivalent type as those recommended should be used with this product.
Only use those batteries recommended.
Batteries are to be inserted with the correct polarity and should not be exposed to excessive heat sources such as fire and direct sunlight.
Replace a full set of batteries at any one time.
Remove any batteries from the product when it is not being used for a long period of time to avoid leakage.
Exhausted batteries should be removed from the product to avoid leakage.
In the event of the battery leaking, do not allow any liquid to come into contact with the skin or eyes. If contact has been made, wash the affected area with copious amounts of water and seek medical advice.
Keep batteries out of reach of children.
Non-rechargeable batteries should not be recharged.
Rechargeable batteries must be removed from the product before being charged.
Rechargeable batteries should only be recharged under adult supervision.
The supply terminals are not to be short-circuited.
Exhausted batteries must be removed and disposed of safely.
Do not dispose of batteries in a fire.
Do not crush, puncture, dismantle or otherwise damage the batteries.
Do not mix alkaline, standard (carbon zinc) and rechargeable batteries (nickel hydride).
Do not mix old and new batteries.
Do not expose batteries to heat or fire as they may explode.
Do not subject the battery (batteries) to mechanical shock.
Do not dispose of batteries in your household waste.
To dispose of the batteries, take them to your local recycling station. Contact your local government offices for details.
This product requires 4 x 1.5 V D (LR20) batteries (not included).
Getting Started

Remove the product from the box.
Remove any packaging from the product.
Place the packaging inside the box and either store or dispose of safely.

In the Box

50 Litre Sensor Bin
Instruction manual

Features

50 litre capacity
Sensor activated or manual open and close mechanism - requires 4 x D batteries (not included)
Easy to remove ABS lid

Description of Parts

1. 50 Litre Sensor Bin
2. Bin lid
3. Liner retaining ring
4. Open button
5. Open sensor
6. Indicator light
7. Close sensor
8. Close button
**Instructions for Use**

**Using the 50 Litre Sensor Bin**

Open the battery cover on the underside of the bin lid and insert 4 x D batteries, ensuring that they are the correct polarity. Close the battery cover.

Place the bin liner into the centre of the sensor bin, folding the top of the liner over the edges.

Position the liner retaining ring over the bin liner to secure it into position.

If the bin liner needs replacing, remove the liner retaining ring and then pull it out of the sensor bin.

Turn on the sensor bin by flicking the ‘On/Off’ switch, located on the back of the sensor bin, to the ‘On’ position; the indicator light will illuminate red for approximately 3 seconds. Once the indicator light begins to flash red, the sensor bin is ready to use.
To open the bin lid, wave your hand approximately 15–25 cm above the sensor; the bin lid will automatically open. The bin lid will automatically close within approximately 5 seconds of your hand leaving the sensor area. Keep the bin lid open by leaving your hand within the sensor area. Alternatively, press the ‘Open’ button to raise the bin lid; it will not automatically close if opened this way. To close the bin lid, press the ‘Close’ button. When the indicator light starts to flash yellow, the batteries will need to be replaced.

**Note:** Do not dispose of rubbish directly into the sensor bin; use a bin liner. Do not overfill the bin liner, as this could cause it to break.

**Warning:** Do not put your fingers or hands into the sensor bin whilst the bin lid is opening and closing.

**Care and Maintenance**

Wipe the inner and outer surfaces of the sensor bin with a soft, damp cloth and a mild detergent. Clean the sensor bin immediately in the case of spillage.

**Specifications**

Product code: BW04408/BW04408R/BW4407
Battery type: 4 x 1.5 V D (not included)
