Manhattan Fire
Instruction Manual

THE SCIENCE
BEHIND HEAT
Please read all the instructions carefully and retain for future reference.

**Getting Started**

Remove appliance from the box.
Remove any packaging from the appliance.
Place packaging inside the box and either store or dispose of safely.

**In the box**

Fire
Pebble pack
Concealed fixings pack containing:
Straight metal wall brackets [x2]
2 ‘T’ shaped metal wall brackets [x2]
No.8 wall plugs (wall fixing) [x6]
5x32 screws (wall fixing) [x6]
Instruction Manual

**Features**

Flame effect
Fire surround with decorative stones
Two heat settings
Fan settings
**Safety Instructions**

When using electrical appliances, basic safety precautions should always be followed. Check that the voltage indicated on the rating plate corresponds with that of the local network before connecting the appliance to the mains power supply. Children younger than 3 years old should be kept away from the appliance unless continuously supervised.

Children from age 3 and less than 8 years should only switch the appliance on/off, if it has been placed or installed in its intended normal operating position, if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children from age 3 and less than 8 years must not plug in, regulate and clean the appliance or perform user maintenance.

Children should be supervised to ensure that they do not play with the appliance. Particular attention should be given where children and vulnerable people are present. Only a qualified electrician should perform repairs to electrical appliances; improper repairs may put the user at serious risk.

This appliance contains no user serviceable parts. Any attempts to repair the appliance may place the user at risk of harm.

If the supply cord or plug is broken, do not use the appliance and ensure that a qualified electrician fixes it.

Never put the supply cord near to or in contact with the hot parts of the appliance.

Keep the supply cord away from heat or sharp edges that could cause damage.

Keep the supply cord out of reach of children.

Keep furniture, curtains and other flammable material at least 1 metre away from the appliance.

Do not run the supply cord under carpets, rugs etc. or anywhere where it may present a trip hazard.

Do not use this heater with a programmer, timer, separate remote-control system or any other device that will switch the heater on automatically, as there is a risk of fire if the heater is covered or positioned incorrectly.

Do not immerse the appliance or plug in water or any other liquid.

Do not touch the appliance during use, as it will get very hot and could cause injury.

Do not use the appliance after a malfunction or if it has been dropped or damaged.

Do not leave the appliance unattended whilst connected to the mains power supply.

Do not leave the appliance unattended whilst it is in use.

Do not attempt to move the appliance during use.

Do not use this appliance in the immediate surroundings of a bath, a shower or swimming pool.

Do not use the appliance if you have wet hands.

Do not use the appliance for anything other than its intended use.

Do not lift the appliance by the front panel.

Always unplug the appliance after use and before any cleaning or maintenance.
Do not clean the appliance with abrasive chemicals or materials such as scourers as they may damage the appliance and impair future function.

The appliance should be used on a stable, heat resistant surface.

The appliance must not be located immediately below or next to a mains power supply.

Keep furniture, curtains and other flammable material at least 1 metre away from the appliance.

Never use accessories that are not recommended or supplied by the manufacturer. It could cause danger to the user and damage to the appliance.

Ensure that the appliance has cooled fully after use, any cleaning or maintenance.

This appliance is intended for domestic use only. It should not be used for commercial purposes.

**Caution:** Some parts of this appliance can become very hot and cause burns.

**Warning:** In order to avoid overheating, do not cover the appliance.

**Warning:** This appliance is not equipped with a device to control the room’s temperature. Do not use this appliance in small rooms whilst occupied by persons not capable of leaving the room on their own, unless constant supervision is provided.

**Note:** When using this appliance for the first time a slight odour may be emitted, this is normal and will soon pass; ensure that there is sufficient ventilation.

**Description of parts**

- Flame effect
- Power On/Off switch
- Fan switch
- 1000W Heat switch
- 2000W Heat switch
Instructions for Use

Helpful Advice Before Fitting

Please retain all packaging until you have checked and counted all the parts and the contents of the fixing pack against the parts list. The fixing pack contains small items, which should be kept away from young children. We suggest that you open the fixing pack and place all the contents into a container, to reduce the risk of losing any small pieces.

Installation

Warning: Do not connect the fire to the mains power supply until all of the instructions have been read, fully understood and the fire has been properly and securely fitted.

Floor Standing Installation

The fire must not be used until it is securely fastened to the wall.

Note: It is recommended that two people install the fire in order for installation to be carried out safely without damage to the fire.

At the rear of the fire on each side there is a bracket, like that illustrated below. When engaged with the wall mounted brackets provided, these brackets provide a secure, wall mounted fixing method that cannot be seen in normal use.

![Diagram of wall brackets and fire mounting](image)

Hold the fire against the wall that it is to be fixed to and mark the level of the bracket fitted to both sides of the fire. The wall bracket should be mounted approximately 30mm from the outer edge of the fire (illustrated on next page). Hold the wall brackets at this position and mark the positions of the screw holes.

For masonry walls, drill the wall and insert the wall plugs.

Screw the wall brackets in place.

Hold the fire against the wall above the position of the brackets and then carefully lower so that it’s fixing brackets engage behind the wall brackets (shown on next page).

Note: This should be carried out by two people to avoid injury or damage to property.
Installation For Mounting The Fire On A Separate Hearth

In order to avoid the possibility of the fire being accidentally lifted from its side mounting brackets when the fire is mounted on a separate hearth, additional brackets are provided. Consequently, the installation instructions below should be followed carefully in order to take this into account. The fire must not be used until it is securely fastened to the wall.

**Note:** It is recommended that two people install the fire in order for installation to be carried out safely without damage to the fire.

At the rear of the fire on each side there is a bracket, like that illustrated below. When engaged with the wall brackets provided, these brackets provide a secure, wall mounted fixing method that cannot be seen in normal use.

Position the fire on the hearth and mark the level of the bracket fitted to both sides of the fire on the wall. The wall bracket should be mounted 30mm from the outer edge of the fire (illustrated on next page).

Hold the wall brackets against the wall at this position and mark the positions of the screw holes. For masonry walls, drill the holes and insert the wall plugs.

Screw the wall brackets in place.

Hold the fire against the wall so that the rear brackets are above the wall brackets and then carefully lower it so that its fixing brackets engage behind the wall brackets (shown on next page) and the fire rests on the hearth.
Draw a line approximately 100mm long on the wall against the edge of the hearth, starting from the outer right hand side of the fire. Repeat this at the left side of the fire.

Remove the fire by lifting it off the wall mounted brackets and then remove the hearth.

Using the lines drawn onto the wall as a reference, drill two holes as indicated in the diagram below and insert wall plugs into the holes.

Insert the bottom ‘T’ shaped brackets into the cut-outs close to the lower edges of the back-panel, allowing them to hang below the fire.

Refit the fire onto the wall brackets and screw the bottom brackets to the wall.

Slide the hearth back into place under the fire.

**Note:** It may be necessary to lift the fire slightly whilst doing so.
Placing The Pebbles
Take the pebbles out of the packaging and place evenly onto the stone bed. Their position can be adjusted later, once the effect of the lighting can be seen.

Instructions For Operation
Make sure that the fire is switched off and then plug it into a mains power supply. Do not use an extension lead or any form of adaptor.
The fireplace has four switches, as shown below.

```
  O          |          |          |
  ___________ |          |          |
      __________ |
      |     ⚀     |
      |          |
```

Press the On/Off switch to operate the fire and the fire effect lights.
The second switch will operate the fan for cool air only. Heating switch 1 will select a low, 1000W heat setting, whilst both switches (1 and 2) will operate a 2000W setting.

Safety Cut-Off
This fire is fitted with a safety cut-off, which will operate if the fire overheats (e.g. due to blocked air vents). For safety reasons, the fire will NOT automatically reset. To reset the fire, unplug it from the mains power supply for at least 15 minutes. Reconnect the fire to the mains power supply and switch it on.

Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The fire/fan will not start.</td>
<td>Ensure that the fire is connected to the mains power supply and is turned on. Check that the safety cut-off switch has not been activated. Wait 15 minutes before attempting to restart the fire. Disconnect the fire from the mains power supply and check the plug to see if the fuse needs replacing.</td>
</tr>
<tr>
<td>The fire/light effect is not working.</td>
<td>Check the bulb by replacing it.</td>
</tr>
</tbody>
</table>
Care and maintenance

Before attempting any cleaning or maintenance, ensure that the fire has been unplugged from the mains power supply.
This fire can be cleaned using a damp cloth with a mild detergent or with a soft, clean duster; never use abrasive cleaners or solvents.

Bulb Replacement

Disconnect the fire from the mains power supply by removing the plug from the wall socket and allow to cool before attempting to replace the bulb.
Lift the fire to release it from the retaining brackets and carefully remove it from the wall.
Note: It is recommended that two people carry this out, in order to avoid injury or damage to property.
Loosen and remove the screws in the back plate behind the stone bed.
Remove the bulb and replace with a Red Fireglow 230V 40W bulb with a B22 base.
Replace the back plate back into position and replace the screws, taking care not to over-tighten.
Reinstall the fire by holding it against the wall so that the rear brackets are above the wall brackets and then carefully lower until both brackets engage.

Dos and Don’ts

Do not cover the appliance whilst in use.
Do not use this appliance until installed as described in this manual.

Specification

Supply: 220-240V~ 50Hz
Heating elements: 2 x 1000W
Fuse: 13A
Lighting: 1 x Red Fireglow 230V 40W B22 base
**Connection to the mains**

Please check that the voltage indicated on the product corresponds with your supply voltage.

**Important**

As the colours in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, please proceed as follows:

The wires in the mains lead are coloured in accordance with the following code:

- Blue Neutral (N)
- Brown Live (L)
- Green/Yellow Earth (↓)

FOR UK USE ONLY - Plug fitting details (where applicable).

The wire coloured BLUE is the NEUTRAL and must be connected to the terminal marked N or coloured BLACK.

The wire coloured BROWN is the LIVE wire and must be connected to the terminal marked L or coloured RED.

The wire coloured GREEN/YELLOW must be connected to the terminal marked with the letter E or marked ↓.

On no account must either the BROWN or the BLUE wire be connected to the EARTH terminal (↓).

Always ensure that the cord grip is fastened correctly.

The plug must be fitted with a fuse of the same rating already fitted and conforming to BS 1362 and be ASTA approved.

If in doubt, consult a qualified electrician who will be pleased to do this for you.

**Non-rewireable mains plug**

If your appliance is supplied with a non-rewireable plug fitted to the mains lead and should the fuse need replacing, you must use an ASTA approved one (conforming to BS 1362 of the same rating).

If in doubt, consult a qualified electrician who will be pleased to do this for you.

If you need to remove the plug - DISCONNECT IT FROM THE MAINS and then cut it off the mains lead and immediately dispose of it safely. Never attempt to re-use the plug or insert it into a socket outlet as there is a danger of an electric shock.

Guarantee

This product is guaranteed for a period of 1 year from the date of purchase against mechanical and electrical defects.

This guarantee is only valid if the appliance is used solely for domestic purposes in accordance with the instructions and provided that it is not connected to an unsuitable electricity supply or dismantled or interfered with in any way or damaged through misuse. Under this guarantee we undertake to repair or replace free of charge any parts found to be defective. Reasonable proof of purchase must be provided.

Nothing in this guarantee or in the instructions relating to this product excludes, restricts or otherwise affects your statutory rights.

In line with our policy of continuous development we reserve the right to change this product, packaging and documentation specification without notice.

Consumables are not guaranteed i.e. plug and fuse.

The crossed out wheelie bin symbol on this item indicates that this appliance needs to be disposed of in an environmentally friendly way when it becomes of no further use or has worn out. Contact your local authority for details of where to take the item for recycling.
